NoteSpace

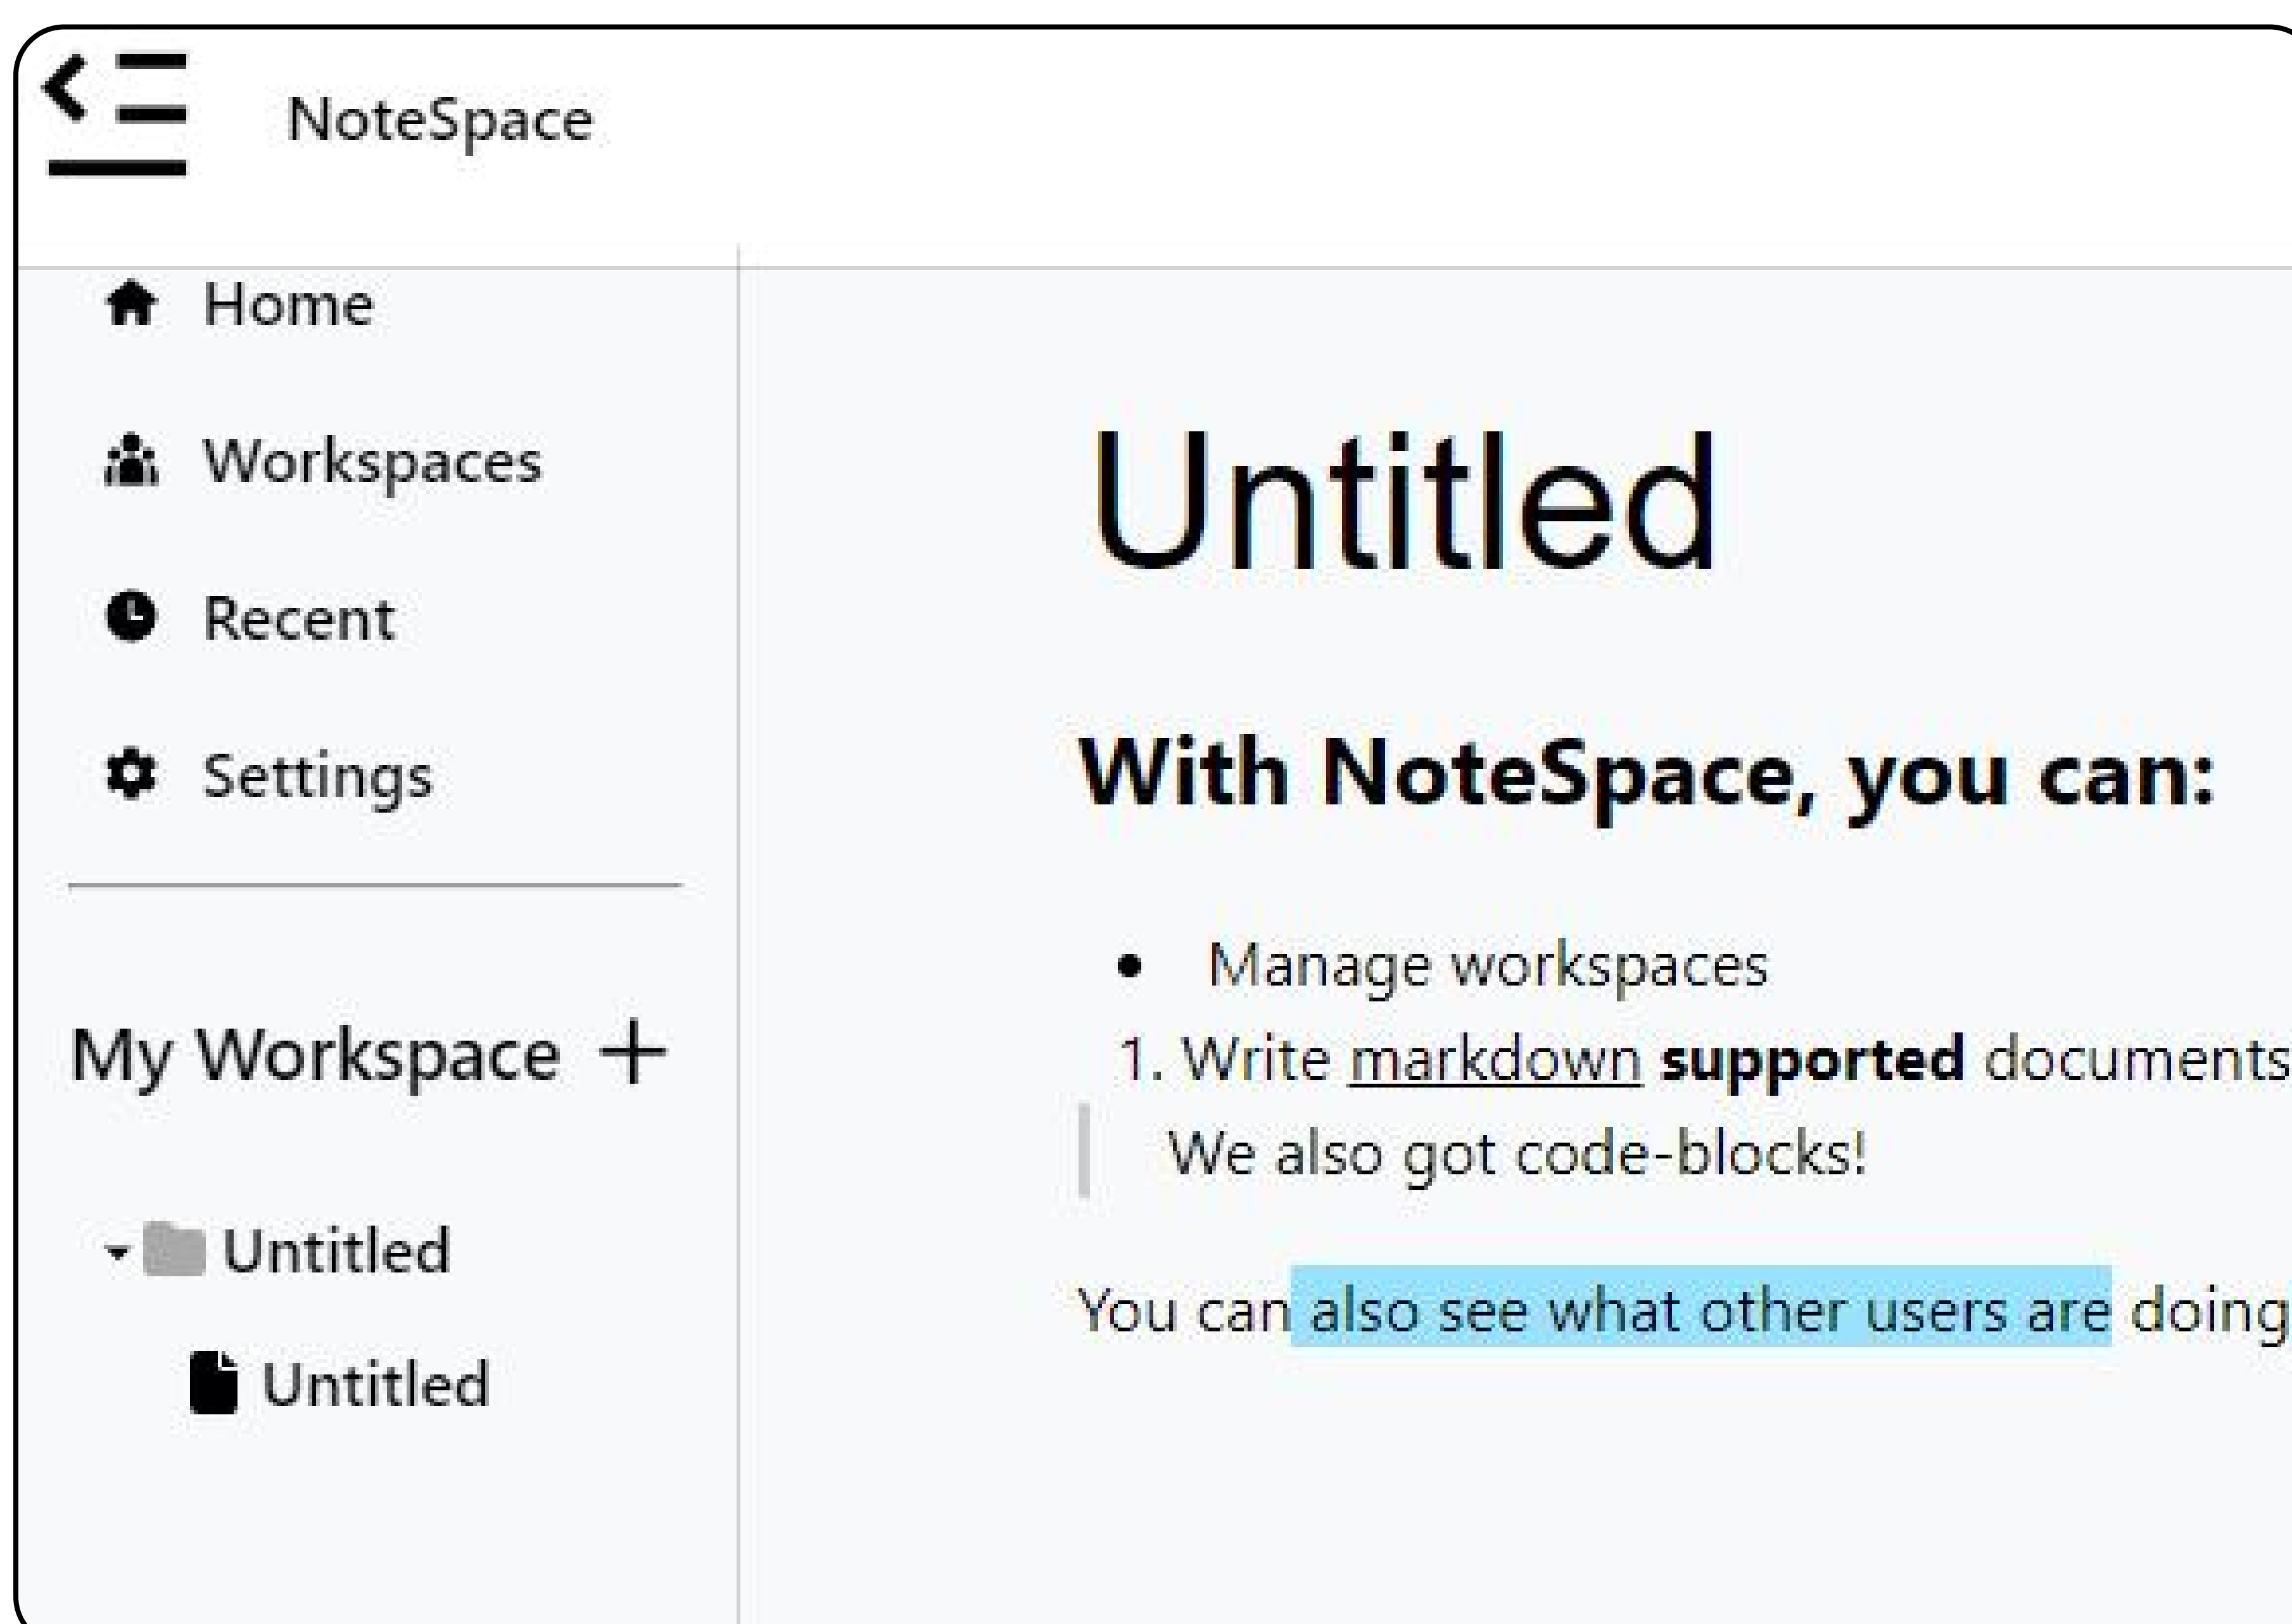

Multi-platform Web Application
for Real-Time Document
Collaboration & Sharing

Problem

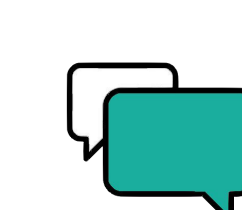

Regarding collaboration, we have two main types of approaches: real-time collaborative platforms, like Google Docs, or through a version control system like GitHub. What is lacking is a way to mix the best features on both approaches.

Solution - What is NoteSpace?

- A web-application that allows Markdown-based workspaces management.
- A collaborative platform that supports both real time and VCS based collaboration.
- Offline & multiplatform support

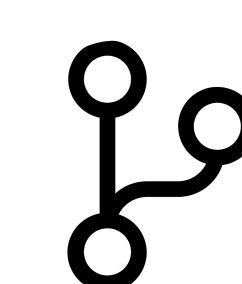

Features

Real time
colaboration
