NoteSpace Info Document

The project is currently in development and data persistence is in an unstable version.

You can still run and test the project, through "dev" mode, which runs on memory.

Project prerequisites:

To run the project, you will need:

- node – you can get the latest version [here](#)

Now you can run the project by following these steps:

- Clone the repo – git clone https://github.com/NoteSpaceTeam/NoteSpace.git
- On the 'client' and 'server' subfolders on 'code,' run:
    - **npm install** – installs all dependencies.

Finally run '**npm start**' on the client and '**npm start dev**' on the server to run it on dev mode.

You can now access the site at http://localhost:5173.

More details about the project can be found at
https://github.com/NoteSpaceTeam/NoteSpace
